

# Week 5

Frontrunn3rs – <http://fr3.frontrunners.dk>

Hello everyone, now I am going to tell you all about week 5 and what did we do.

## Day 1

In the morning Ole showed us films that were filmed and edited by the previous Frontrunners 1 and 2. We then showed Ole our three films which were made last week. He seems impressed with these three different films.

In the afternoon, Ole gave us work to learn how to plan an international Festival. We were split into groups to discuss in more depth of what we must to plan. The factors includes the programme, locations of the venue, in which country, who we want to give a lecture and how many people to attend for this and many more.

## Day 2

All day today we all focus on the website, Vlog, blog, photos, filming and editing also uploading these onto the website which hopefully you have seen.

In the evening we all got together to play sport, such as hockey, football or badminton. Many of us worked hard and enjoyed the bonding of the team.

## Day 3

In the morning, Filip gave a talk in Minority, you can see more information about this topic in the interview. After lunch Filip gave us plain piece of paper, we were puzzled about this at first before realising what we were meant to do. Each of us have paper with our names on and then pass it around to other Frontrunners (FR) for them to write any positive comments about that person's name on the paper. When the person's named paper completed by all of the Frontrunners (FR). We can open and read what our fellow Frontrunners (FR) has thought of us.

Afterwards we had group evaluation as it has been one month here in Denmark. Summing up the positives and negatives about different things such as the food, Castberggaard, accommodation and the programme course.

In the evening, one of the FR, bengie gave a presentation about Buddhism, his personal experience including the what, how and the history of Buddhism. The rest of the FR sat around fascinated and enjoyed listening many new things about Buddhism.

## Day 4

Today we the Frontrunners learned a brand new topic which was really interesting and different and this topic is 'Deafhood'. The original lecturer for this topic is Paddy Ladd from University of Bristol, England. However due to personal reasons that he cannot come to Denmark so therefore he has send a film of himself for us to watch. He was assisted by a Danish woman called Mette Sommers who already learned about Deafhood.

In the evening, what did we do? We all sat around in front of the TV and watched a DVD 'til late night.

## **Day 5**

Again all day we focused on Deafhood in more depth and discussed our own experiences. There are few factors included in the Deafhood such as Oppression and Colonisation.

Do you want to know more about Deafhood? I ask you, Does all deaf people have Deafhood? See more in the Deafhood interview.

In the evening, one of the FR volunteered to give a presentation on Evaluation, again we all sat around and absorbing in new information.

Afterwards at 12 midnight, a group of us had an idea as there were thousands of bright shiny stars in the black sky; we all agreed to go out for midnight walk. Wrapping up warm with scarves, hats, and gloves and zipping up warmly. We ventured out along the road in pitch darkness, staring up to the sky with only light from the moon and the stars. A couple of us messed about, trying to frighten one and another by disappearing and startling them. Many photographs were taken, upon our return to our homes at 1am in the morning where we snuggled up in our warm beds.

## **Day 6**

A group of us went to Aarhus for shopping, and the rest of us stayed behind in Castberggaard, some of us did some work, played sport or relaxed and chatted away.

In the evening, we all had party with a unusual theme. We didn't wear normal party clothes; we wore absolutely different clothes...

## **Day 7**

All of us remained in Castberggaard and again some of us did our own work, sport like running laps around or fitness gym. A group went out for walk in the countryside returning with reddened cheeks.

Do you want to know more about us in upcoming weeks, see week 6 coming up soon.
